CapCut assembly guide for the Ronaldo / Portugal World Cup warning video.

## 1. Folder Map

| 01 Voiceover                  | Main ElevenLabs V3 narration. Put this on the main audio track first.                |
|-------------------------------|--------------------------------------------------------------------------------------|
| 02 Narrative Insert Clips     | Actual cutaway clips where voiceover should pause or dip and clip audio should play. |

## 2. Main Edit Rules

| No FIFA clips     | Avoid FIFA footage because previous uploads triggered copyright restrictions.        |
|-------------------|--------------------------------------------------------------------------------------|
| Pacing            | Change visuals every sentence or two. Most B-roll should last 2-6 seconds.           |
| Narrative inserts | Use these as proof moments. Keep them short and let the original audio play.         |
| Tone              | Respectful but urgent. This is not anti-Ronaldo; it is a Portugal World Cup warning. |
| Graphics          | Use each graphic for 5-8 seconds with a slight zoom or push-in.                      |
