

Editor Instructions: The World Cup Has A SERIOUS Norway Problem

Simple CapCut assembly guide for the Norway video package.

1. Folder Map

01 Voiceover	Main ElevenLabs narration. Put voiceover_elevenlabs_full.mp3 on the main audio track.
02 Narrative Insert Clips	Clips that interrupt the voiceover briefly: ESPN insert and San Siro proof moments.
03 B-Roll Short Clips	Main muted clips for fast pacing. Use these under the voiceover.
04 Longer B-Roll Source Clips	Longer backup B-roll if the editor needs extra material.
05 Graphics	Stat, group, and weapon-stack graphics.

2. Main Edit Rules

Voiceover	Use the ElevenLabs voiceover as the spine of the edit.
B-roll	Change visuals often, usually every sentence. Most B-roll should be 2-7 seconds.
Narrative inserts	Pause or heavily lower the voiceover, let the insert audio play, then return to narration.
Copyright caution	Do not use old FIFA-linked clips from Video 001. Use the provided replacements and graphics.
